Goals for 2018 relating to the Strategic Plan objectives:

- Encourage High Performance athletes to help facilitate jumps clinics for young athletes to promote their event
- Run clinics or common practices where coaches can come together and athletes can benefit from different drills, techniques and perspectives
- Continue to promote Track and Field events in our neighbourhood
- Have friendly meets for athletes to help achieve the standards (ie. avoid strong negative winds, wind assisted meets for those tracks with 4 pits; if competition is behind schedule, don't cut athletes' warm up times)
- More jumps only meets, to encourage a focus on jumps and build more of a community among jumps athletes and coaches
- Have a survey for all athletes asking them about their needs to improve their event outside of their practice
