

Appendix –Zone 3, 4 &5 Director’s Report

As state in the original report from the other Zone Representative - communication has been a major hindrance within this Zone and possibly throughout the whole organization. This problem cannot be overstated enough. This year and the next few years will be difficult times for all because of changing lifestyles of Canadians. This time period could be a golden opportunity for the Board and the clubs to become more current with the trends of Athletics and social media.

I would like to thank the Surrey Clubs for coming together (stepping up to the plate) and taking over the JD championship this past summer because of the wildfires and smoke in the province.

Each year I like to take the opportunity to once again “Thank” our partners, spouses and volunteers both financially and supportively for their understanding and hard work. Thank you soooooon very much we could not have as successful year as we did without you. Same goes for our hard working office staff a big THANK’S.

On a personal note this year has been a time of reflection- my duties or lack of, what my role is in this organization and how the organization could benefit from my knowledge and experience. I hope that there is a change next year. (As a sidebar I understand that I may be the only Zone Director left).

May 2017-2018 be one of the best years we have as a club organization that is growing and changing.

Good Luck to Jordan in his new position on the Board.
